Aloha Pamela,

I hope everything is fine and dandy. Just wanted to send you this map that Pioneer mill did in 1957 and what a lineal descendant of olowalu Linda Nahina Magelianes was speaking about at the last CPAC on Tuesday.

When the CPAC starts to make recommendations to olowalu growth plans it would especially be good to have this map provided as a focal point to assure this is not left out of the planning stages.

We also think that having the ability to pin point historic properties throughout the full extent of the entire olowalu will add more clarity on why certain areas should be left in open space.

Mahalo nui loa for your consideration and I will also be sending more historical documentation. Within the next few days.
