

What should we preserve in West Maui?

I am concerned about the specific historical sites out in Olowalu where the camp US and new development of mansions p.Martin and j.Riley. The sites were well exposed in 2013-14...WWE HERE ARE THEY NOW

Cemeterys - 1 located behind Aquatic Center, 1-Olowalu mauka highway before Olowalu store, 1-Kapalua Village C. Chinese, restore seamens cemetery @ Wainee Cemetery Church Maria Lanakila and maintain.

TMK (2) 4-5-008:001 David Malo LCA 3702 homestead, Alamihi fish pond, and battle ground pre-contact between Kauhi & Kamehameha.

Restore agricultural ahupua'a. Olowalu historical refuge. Any place significant to Hawaiians.

All. Restore the area across from 505 Front Street.

All existing views, especially of ocean, mountains & nearby islands. It is a tragedy that ocean views and access from Canoe Beach to Kapalua have been reduced.

Stop development - put into protection - restore what can and educational resources.

No more development except affordable housing for local residents who work in West Maui.

Restore & maintain major historical sites. Moku'ula? Restore it. Restore indigenous communities in the valleys.

Sugar cane plantation life
Old trail across pali

Protect the Banyan Tree - why isn't there a barrier at the base of the tree to prevent people from constantly climbing up & swinging on vines? Why isn't there a multi-language sign next to the base

Protect the Banyan Tree (con't) - of the tree explaining it's importance? People still carve their names or initials in it. Replace those tiny [No Climb] signs.

Historical districts in Lahaina - and all encompassing objects, buildings, sites & structures. Lahaina is my home - I would like to see the safeguarding & preserving of all our historic properties.

Hawaii host cultural history. Hawaiian agricultural methods, food prep, food storage & traditional food consumption.

Historic battlegrounds, preservation of open spaces, vistas to the sea from SMA guidelines, Lahaina & its history, agricultural legacy, plantation historic areas.

Maintain golf course in open space/park designation @ Kaanapali.

Reinvigorate LRF (Lahaina Restoration Foundation).

Research and preserve historical sites (Mokuula) Heiau, Puu Kekaa

What should we preserve in West Maui?

I defer to our kupuna. Ask Keeaumoku. I stand with him.

The native birds and flora - you don't mention these, but developments that threaten them and their habitat need to be denied.

Have a council of kupuna set up the rules.

Mokuula and Loko O Mokuhinia (AKA malu-ulu-o-Iele); Pakala (AKA Kamehameha Iki Park); Hale Kamani (Kamehameha III School); Keawaiki (Lahaina Courthouse, Banyan Tree Park, Library Lawn)

Polanui ("Sharkpit"); U'o (Lahaina Small Boat Harbor); Hau'ola Store (NW corner of library lawn).

We must be careful about the environmental changes which are happening around us. The <http://www.rushanessay.com/> is a really great platform for the writers to learn more skills.

Natural Resources. It is was provides sustenance to some local people, it drives the economy, it improves quality of life, and most importantly it's what keeps us alive (clean air, water and soil).

We must preserve West Maui's remaining ag lands. And we must encourage regenerative farming practices on those lands -- to malama aina, to strive for food security.

Preserve remaining West Maui at land!

The MOKU'ULA ISLAND on front street in Lahaina should be restored in a historically accurate way. At least one major Heiau should be restored in a historically accurate way.

I don't know specific sites. I believe all cultural, historical and archaeological properties/practices should be consulted with Hawaiians of their importance before any development continues.

We're at a tipping point. We need a moratorium on all development in order to see where we are now in relation to the health of our land, our sea and the cultural practices of the Hawaiian people.

Agricultural land needs to be preserved for future generations

Please preserve agricultural lands of west Maui. They preserve the Beauty of the area, its environment and cultural Ag practices. Also please preserve water resources needed for Ag lands. Mahalo

Preserve Launiupoko beach and its marine life from further developments that destroy the environment. Preserve animal life unique to Maui, preserve green open spaces for their life to continue.

The West Maui housing is important to me because it's all land that has been there since I was born. I would not like it if it changed.

We should definitely preserve, or at least attempt to preserve all of our irrigated land. We need to actually use them for what they were created to do: Grow crops to supply food to our island.

What should we preserve in West Maui?

We should preserve old, interesting structures such as Old Maui High School. We should preserve these properties or practices by continuing on supporting these things and attending the practices.

We should preserve medical services in West Maui by adding more hospitals & medical facilities. I think we need more because its hard to get around the island with only one lane.

I think the ocean should be preserved & should be taken cared because Hawaii is known for the ocean & trash shouldn't be in there. We should keep the ocean clean by cleaning it & not throw trash in it

What we should preserve in West Maui is the lands like sacred lands because those lands are important to everyone. We should preserve these properties & practices by making signs so people understand.

I believe we should preserve the Banyan Tree Park, most land in West Maui (no more houses), Lahainaluna & singing our alma mater & o kou aloha. Make sure people stop trying to build on all free land.

We should preserve the Cliffhouse because it attracts tourists & the teenagers would go there to hang out and swim, instead of doing drugs.

I feel like we should preserve anything with significant history. We can preserve it by teaching people about the significance of them.

We should preserve the hula dances in Cannery Mall, Outlets of Maui and in the other restaurants and hotel to entertain tourists and people.

The private lands that belongs to natives. Prohibit authorities from taking this land.

Preserve Nene and agriculture. We preserve the animal by breeding them.

Preserve whatever the people want. Sell them to no one.

Preserve The "L"

Make sure we are taking care of greenery.

Preserve sacred lands in West Maui because native plants are slowly dying cause there's no place to plant them. Preserve them by having the community participate in community service projects

Preserve The Land

Preserve the Beaches. Stop construction, Land NOT for sale

The beaches. Being in a safe environment.

We should preserve the housing sites in West Maui by limited construction, keep it natural.

Stop development !

What should we preserve in West Maui?

Stop development! By moving the road to the bypass, they are opening up much more land to be developed. Make hotel permits stricter. We need to turn what we have into local housing.

Preserve the buildings on Front Street and the land. Don't let man change it so much.

The waterfalls and small ponds found within the island. Better funding would help.

Preserve the beaches. We need to preserve all the native land. Beach cleanups & have beaches open only to people who are from here.

Everything Hawaiian. I don't know - DLNR ?

The beaches

Housing

The 'Aina

Have beach cleanups

Limit Construction (Industrialization)

Protests

Preserve the 'Aina and the Beaches.

Ban Tourists

The 'aina

The Beach

Limit Industrialization

Educate people

The beaches and land

We should preserve our own Lahainaluna High School. We should preserve these properties & practices by fighting our right & nature like school & we should preserve it.

Water & rivers. Stop them from taking it away. It is important to me b/c my ancestors lived here & used it as a source. Take a stand.

Protect the "L"

It should not be a every person thing where they can just hike up there.

Preserve nature since it is part of WMaui & some of the trees have been here for a long time. Preserve the buildings such as Lahainaluna HS so the world can see. Prevent destruction of nature & donate

We should preserve open space, Hawaiian cultural, historic, and archaeological properties.

By providing more education to our community members and tourists.

What should we preserve in West Maui?

We need to save the beaches for everyone. There is a lack of beach parks and beach parking along Kaanapali. The resorts have walled the public off.

Public access to beaches and golf courses, which includes adequate parking.

No more hotels on the shorelines. Keep the undeveloped shorelines open and accessible to public as beach parks. Keep big box stores out of West Maui. Preserve all historic sites.

I think restoring part of Mokuula is extremely important to the history of Lahaina. Lahaina Restoration Foundation has been instrumental in resurrecting our historical sites on the West side.

The integrity of its' residents and concerns for their natural resources fall upon deaf ears. The Lahaina District has been mismanaged no different from any other tourist destination in Hawaii.

Save Canoe Beach.

Save Honolulu Bay.
